

GAR Commercial Females

UPDATED 3/31/20

The 118 commercial females will sell in 11 groups, safe in calf to GAR Ashland, GAR Quantum, GAR Inertia, GAR Home town, GAR Phoenix, GAR Breakthrough, GAR Combustion and other excellent GAR sires. The females have been genomic tested using Method Genetics Choice. Because the MG database is derived from information supplied primarily by GAR seedstock and commercial herds, the MG genetic breeding values and indexes serve as a BENCHMARK for GAR customers.

Simply put, the Method Genetics evaluation benchmarks our cattle and the cattle of our customers who participate in the MG program against one another. This is an elite population of Angus cattle selected for reproductive efficiency, calving ease, docility, postweaning growth, feedlot performance and carcass value, NOT THE AVERAGE ANGUS ANIMAL.

Commercial females sell as a group with the option to take multiple groups.
