

GAR COMMERCIAL HEIFERS

The 129 commercial heifers in Group 1 will sell AI bred 3/9/23 and safe in calf to GAR Transcendent. Will calve 12/17/23. The heifers have been genomic tested using Method Genetics Choice. Because the MG database is derived from information supplied primarily by GAR seedstock and commercial herds, the MG genetic breeding values and indexes serve as a BENCHMARK for GAR customers. Simply put, the Method Genetics evaluation benchmarks our cattle and the cattle of our customers who participate

in the MG program against one another. This is an elite population of Angus cattle selected for reproductive efficiency, calving ease, docility, post weaning growth, feedlot performance and carcass value, NOT THE AVERAGE ANGUS ANIMAL. Current weight: 1050-1100. **FREE DELIVERY. FEMALES ARE LISTED IN ROI ORDER AND WILL SELL FROM HIGHEST ROI TO LOWEST. BUYER CAN TAKE AS MANY HEIFERS AS NEEDED, BUT MUST TAKE A MINIMUM OF TEN HEAD.**
