

22nd Annual
Profit Proven

**Gardiner-Influenced
Commercial Angus Female Sale**

Monday, November 25, 2024 - 12 Noon

At the Henry & Nan Gardiner Marketing Center

At the ranch near Ashland, Kansas

GARDINER ANGUS RANCH

1182 CR Y, Ashland, Kansas 67831 • Office: (620) 635-2156 • Fax: (620) 635-2871 • GardinerAngus.com • Email: gar@gardinerangus.com
Greg (620) 635-0233 • Mark (620) 635-5095 • Grant (620) 635-0382 • Cole (620) 635-0727 • Ransom (620) 635-0283

Progressive Beef Producers:

Welcome to the 22nd Profit Proven Gardiner-Influenced Commercial Replacement Female Sale. The commercial producers participating in this sale represent some of the most progressive, most disciplined and most committed ranchers in America today. Each of these family operations have at least a decade of GAR-Influence and most have multiple decades and even generations. A common thread in each of their operations is they know what makes money in the beef business. All are diversified and have skin in the game throughout production, including retaining ownership on their fed cattle. They understand the importance of Method Genetics EPDs and indexes and have used the information along with in-herd performance, cattle feeding, and grid closeouts to benchmark consistent improvements.

The females offered in this sale are the product of years of disciplined selection for all the traits of economic importance. Professional cattle producers tend to stay focused, they understand the markets and continue to seek opportunities to add value to their product. As most everyone knows, good replacements and producing cows are hard to find. The opportunity to add elite genetics, in volume, sired by or bred to the Angus breed's most proven AI sires is unprecedented.

This sale will begin with 32 two-year-old cows with fall calves at side. The pairs are ready to go and the cows will be ready to breed. The Profit Proven group has assembled 188 AI bred heifers, with an average Method Genetics ROI of 236, bred to Powercat, Transcendent, Turbo, Apex, Full Throttle, Pringle, Acceleration and Fireproof. The 256 bull bred heifers are safe in calf to sons of those same AI sires and the entire group Method Genetics average for ROI is 235. For any cow buyers, don't sleep on the 225 proven, producing cows, both AI and bull bred, with an average ROI of 213. We often talk about genetic acceleration. The 77 open fall heifers are a very special group of elite genetics, average ROI of 251, with exciting potential, depending upon a new buyer's marketing strategies.

We think it's worth noting, in the era of genetic acceleration, all of these females have extraordinary value. While we all strive to achieve 100% conception rates in our herds, understanding the value of these females throughout all production sectors is important. Since 2017, we have charted the closeout performance on all our home-raised steers and heifers as well as our customers that have sold through U.S. Premium Beef. From 2017 to Oct. 8, 2024, we have charted **4,869 heifers**, that have graded **99.26% USDA Choice and higher, 47.03% Prime, earned \$174.28 per head premium above the cash market** for a total of **\$848,571 in real dollars** returned to the owner of the cattle. Just a reminder—**this data is on fed heifers only charted from 2017 to Oct. 2024!**

GARDINER ANGUS RANCH GRID SUMMARY • APRIL 2017—OCT. 2024

WEIGHTED AVG.	NO.HEAD	DRESS%	CW	%CHOICE	%PRIME	WEEK'S MKT	+/- MKT	PREMIUM/HD	\$ABOVE BASE
April 2017-Oct. 2024	23,231	63.66%	923	98.82%	36.00%	\$137.75	\$10.52	\$153.16	\$3,558,039
Heifers 2017 - 2024	4,869	63.27%	901	99.26%	47.03%	\$129.48	\$12.03	\$174.28	\$848,571

We hope you will plan to join us Monday, November 25, beginning at 12 noon. The cattle will sell on Superior Video. If you have questions or would like to see the cattle before the sale, I encourage you to contact the owners directly. The cattle will not be on site sale day.

If I can be of any assistance, please free to contact me.

Thanks for your interest,

Mark Gardiner

2024 PROFIT PROVEN GROUP

The Profit Proven group represents family owned ranching operations and generations of Gardiner Angus Ranch genetics. The Profit Proven members were early adopters of EPDs, AI and using Method Genetics genomic technology as a benchmark for selecting replacements

and managing risk in a retained ownership environment. Similar focus on health, nutrition and temperament make this offering an opportunity for anyone seeking to make genetic improvements in your cow-calf operation.

Giles Ranch
Katie, Molly & Jenny, Bucklin, KS

Giles Angus
Logan Giles, Canyon, TX

44 Cattle
Lynn Goforth, Max Meadows, VA

Linda Long, Pearsall, TX

McKinney Land & Cattle
Josh McKinney, Englewood, KS

Giles Ranch

Giles Ranch is a fourth generation, family-owned, diverse beef operation in Clark County. Giles Ranch has been a GAR customer for three generations! The commercial cow-calf, stocker-feeder operation typically retain ownership and market through U.S. Premium Beef. The family also markets grass-fed, grain-finished freezer beef.

Jenny Betschart (620) 826-5026
Katie Shaw (620) 826-5027
giles@kans.com • GilesRanch.com

Giles Angus

Giles Angus is a registered and commercial cow-calf operation located near Canyon, TX. Kelly purchased his first Angus bulls from Henry Gardiner in 1974. Giles Angus focus on genetic for the traits of economic importance including moderate stature and docility, which result in functional Angus females and athletic herd bulls with birth to harvest value.

Logan Giles (806) 316-4452
Kelly Giles (806) 290-3161
kelly.giles@gmail.com
GilesAngus.com

44 Cattle

The Goforth family operates a diverse beef operation in the Appalachian Mountains of Southwest Virginia. From stocker-backgrounding to cow-calf, the Goforths began investing in GAR genetics nearly a decade ago.

Lynn Goforth (276) 724-0511
lynnngoforth44@yahoo.com

H6 Ranch LLC

Seth Harrington and his family operate H6 Ranch LLC, a diversified commercial Angus operation. Seth is a longtime buyer for Cargill, procuring quality fed cattle for processing. Seth and his family are close friends and neighbors of the Gardiner family. His attention to detail in developing the cowherd combined with his day job as a professional buyer for a major packer leads Seth to know what makes money in the beef business.

Seth Harrington • (620) 204-0745
Email: H6Ranchllc@gmail.com

JE Farms Inc.

JE Farms Inc is a diversified wheat and beef cow-calf operation in Woods County, Oklahoma, and Harper County in Kansas. Henry has been an excellent "student" of buying known quantity genetics and using a disciplined selection to make significant progress in the cow herd. He uses Method Genetics as a benchmarking tool and retains ownership on his open heifers.

Henry Nighswonger (580) 748-3344
Email: Nighswonger93@yahoo.com

Long Ranch LLC

The Long family has been purchasing GAR genetics for more than a decade. Dale Long began purchasing GAR bulls to use on his commercial cowherd. After analyzing the results, he made the decision to accelerate genetic improvement by applying more selection pressure to improved carcass merit. Today the herd is 100% GAR genetics.

Dale, Scott & Nathan Long
(580) 273-2311
longranchok@gmail.com

Lynch Cattle

Lynch Cattle a family owned and operated cow/calf operation located in Frio County Texas. Over the past 25 years they have been working on improving their herd's maternal and carcass genetics. In 2020 they purchased their first GAR bull and have continued with GAR bulls! Now they are "Getting Better Faster" growing our quality through proven GAR genetics!

Linda Long (830) 931-4673
lindatheladybug@yahoo.com

McKinney Land & Cattle

Josh McKinney has built an outstanding cowherd using 100% GAR genetics and applying the discipline to create value by selecting for all the traits of economic importance. The cows offered in this sale represent young, proven, productive females with the inherent genetics to perform regardless of marketing end point.

Josh McKinney (620) 539-0018
crossf1994@gmail.com

2024 PROFIT PROVEN GROUP

Mayer Legacy LLC

Mayer Legacy LLC is a fifth generation commercial cow-calf operation in Texas County, Oklahoma. By using tools and technology to make genetic improvements in the cow herd, this long-time GAR customer delivers cattle earning some of the highest premiums paid by U.S. Premium Beef. Margie Mayer Rice continues to manage the diversified operation producing value-added female replacements, feeder cattle and private treaty Angus bulls.

Margie Rice: (580) 461-0071 • mayercattle@gmail.com

Means Ranch

Craige & Jesse Means, and the Means family relationship with GAR spans more than a half century. The Means use Method Genetics as a tool when selecting replacement heifers and commercial bulls. They also retain ownership of steers through the feedlot and market them through U.S. Premium Beef.

Craige (254) 977-2379 • means.ranch@yahoo.com
Jesse (254) 979-0560 • jesse.means@yahoo.com

Merrill Ranch

The Merrill Ranch has a rich history in Comanche County in southwest Kansas. The commercial cow-calf operation has practiced discipline in their selection of GAR bulls, determined to improve the birth to harvest performance of the cowherd. Method Genetics provides documentation and the USPB closeouts and premiums confirm the ranch's decision many years ago.

Jamie Miller, Foreman (620) 388-3568
Email: merrill.rks@yahoo.com

Milliken Land & Cattle

Kevin and Marta Milliken made their first purchases at Gardiner Angus Ranch in 2015 and have added to their GAR influenced program almost every year since. The results are an elite cowherd with extraordinary value opportunity at every phase of production. The home-raised open heifer replacements ensure years of genetic excellence and productivity.

Kevin & Marta Milliken

2024 PROFIT PROVEN PROFIT PROVEN SALE INFORMATION

- **Groups listed individually will sell from top to bottom of the group.** For instance, Group #1, 10 head will sell beginning with ID 2347. The first buyer of larger groups (more than 10 head) must take the FIRST 10 HEAD. The winning bidder may also take as many head or groups in the particular category or consignor. For instance, the winning bidder of group #2 must take 10 head but may take all of group #3 but not Group 4, since Group 4 represents a different owner.
- **Cattle will sell in catalog order.**
- **Cattle are sold FREIGHT ON BUYER unless otherwise designated. Delivery dates are preferred and listed with each group.**
- **Buyer will receive an invoice from Cogent Ideas Inc. Delivery arrangements & payment are between buyer and seller.**

If you need assistance please call any member of the sales team.

2024 Profit Proven Average Method Genetics EPDs & Indexes for Commercial Heifers

	CED	DOC	CEM	CW (LB)	MARB (Score)	REA (Sq.In)	MPI (\$)	QPI (\$)	ROI (\$)
Method Avg.	11.0	12.0	9.8	27.0	0.86	0.74	125	105	210
PP Female Avg.	12.4	15.7	10.3	31.0	1.07	0.84	134	120	230

METHOD GENETICS® CHOICE EPD AND SELECTION INDEX KEY

CARCASS WEIGHT (CW): The carcass weight EPD is reported in pounds of harvest carcass weight. As with other weight traits, selection for weight genetics is moderately to highly heritable and will lead to increased directional genetic change in pounds. The CW EPD has contributions not only from the genotyped calves, but harvest carcass records, ultrasound indicator trait results, and available pedigree.

MARBLING (MARB): Marbling EPDs are reported in harvest marbling score units, with a higher value being more favorable.

RIBEYE AREA (REA): The ribeye area EPD, with a higher value as the typical desired direction, can be used to place selection pressure on this trait to impact red meat yield.

CALVING EASE DIRECT (CED): Reported as a percentage of unassisted calvings, this EPD is used to select favorable calving ease genetics for use in matings to first calf heifers. The value is more noted for sire selection. In Angus-influenced herds that have heavily emphasized calving ease genetics, selection pressure for this trait may or may not be a priority. A higher value is more favorable. For example if there was a 5 percentage point difference between to animals (+10 vs +5), one would expect 5 more calves out of 100 to be born unassisted in future progeny, to favor choosing the animal with the CED of +10.

DOLICITY (DOC): Docility is reported as a convenience trait with a higher value favoring more docile temperament. Reported in percentage units, these EPDs can be used as an accessory sorting tool as needed.

CALVING EASE MATERNAL (CEM): This EPD is applicable to calves out of daughters of first-calf heifers and their unassisted calving percentage difference relative to other individuals. Again, as with CED, a higher value is more favorable and reported in units of percent.

MATERNAL PRODUCTION INDEX (MPI): The Maternal Production Index is reported in dollars per calf produced from the breeding herd with Angus-based genetics. It encompasses direct and maternal calving ease, heifer pregnancy, weaning growth, maternal milk, and mature size differences in a scenario where replacement females are retained and calves are marketed at weaning.

QUALITY POUNDS INDEX (QPI): The Quality Pounds Index is reported in dollars per calf for herds with Angus-based genetics. It focuses on the terminal side of the herd's business for feedlot gain and carcass merit genetic differences. There are no provisions for calving ease or maternal traits, with the assumption that all calves are under a retained ownership scenario fed out and marketed on a premium quality-based grid.

RETAINED OWNERSHIP INCOME (ROI): Cattle producers interested in a complete production system approach from conception through carcass end-point should use the Retained Ownership Income index ties together reproduction, calving ease, maternal genetic merit, growth throughout the calf's lifetime, and quality based carcass merit in an Angus-based herd. The ROI is reported in dollars per calf produced in the herd, and consolidates the sub-indexes of MPI and QPI.

METHOD GENETICS EPD AND INDEX PERCENTILE RANKS (%) are a numeric ranking of the animal's EPD and Index values on a 1% to 100% scale. For most traits a lower numeric value is considered more favorable, such as for CED EPD. For example, a 25% presented with an EPD indicates that animal is in the upper 25 percent of the animals in the Method Genetics evaluation for calves born in the last five years.

BULL BRED HEIFERS

22 head: Bull bred 4/17/24 to 5/30/24 to GAR Iconic T3222, Mayer Veracious 329 and a commercial Mayer grandson of Prophet K263. This group of home-raised heifers had steer mates that graded 77% Prime, and that's after we kept the top end for bulls. Heifers are cake broke, hot wire broke and will make great cows.
