

613 BRED COMMERCIAL FEMALES

Gardiner Angus Ranch is excited to deliver the latest technology in characterizing commercial Angus females using the common currency of the Angus \$Value indexes. We are selling 613 head of GeneMax® tested bred commercial females. Buyers are bidding on an entire group but may take multiple groups.

The GAR commercial Angus female offering is genomically tested with the GeneMax® Advantage™ test and results include \$Value indexes for \$M, \$B and \$C along with percentile ranks for key traits such as weaning weight, carcass weight, marbling and ribeye. The individual trait rankings are benchmarked against nearly 194,000 DNA-tested

commercial Angus replacement heifer candidates.

The \$Values for the GeneMax females are directly comparable to the Angus \$Values on all GAR registered cattle. This industry leading Angus \$Value language allows selection of commercial females with the common index language used by producers to select the bulls they purchase.

These females will make elite commercial replacements bred to high-use GAR AI sires and sons of GAR AI and ET sires. This historic market presents tremendous investment opportunities today and greater profitability in the future.
